PROFESSIONAL SUMMARY

Full-Stack Software Engineer and AI/Agentic Systems specialist with 6+ years of experience designing and shipping production-grade web applications, e-commerce platforms, and AI-powered automation systems. Proven track record building 50+ e-commerce stores and web applications, developing multi-agent AI systems using LangChain, CrewAI, AutoGen and LangGraph, and delivering RAG pipelines integrated with OpenAI, Gemini, and Claude APIs. Skilled across the full stack (React.js, Next.js, TypeScript, Node.js, Java/Spring Boot, Python/FastAPI) with deep e-commerce expertise in Shopify Plus and WordPress/WCFM. Known for translating ambiguous business problems into scalable, measurable technical solutions.

CORE SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, React Native, Node.js, Java, Spring Boot, C#, .NET 8, Python, FastAPI

AI & Agentic Engineering: LangChain, CrewAI, AutoGen, LangGraph, RAG Pipelines, Vector DBs (ChromaDB), OpenAI API, Gemini API, Claude API, Prompt Engineering, MCP Servers

E-Commerce & CMS: Shopify Plus, Shopify Theme Development (Online Store 2.0), WordPress, WCFM, Magento 2

Frontend & Architecture: Responsive UI, Component Architecture, Performance Optimization, Core Web Vitals, SEO, Tailwind CSS

Backend & Infrastructure: REST APIs, API Integrations, Automation Systems, Railway Deployment, Software Infrastructure, MEAN Stack

Tools & Practices: Git/GitHub, Claude Code, Cursor, Agile Collaboration, Cross-Functional Delivery

PROFESSIONAL EXPERIENCE

Software Developer — Centre for Internet Studies & Artificial Intelligence (CISAI)

July 2025 – Present | Kerala, India (Remote)

- Developed production-ready AI-powered web applications using React, TypeScript, and modern frontend architecture, serving cross-functional business units.
- Designed and deployed intelligent automation systems and agentic AI workflows (LangChain/LangGraph-based) that streamlined internal business operations and reduced manual processing time.
- Integrated LLMs (OpenAI, Gemini, Claude), third-party APIs, and AI tooling into scalable frontend applications to enable AI-native product features.
- Optimized application performance, reducing load times and improving Core Web Vitals and overall user experience.
- Partnered with cross-functional teams (product, design, backend) to ship AI-enabled products from concept through deployment.

Software Developer — Ergode

January 2025 – June 2025 | India

- Built scalable frontend features supporting large e-commerce catalogs and high-traffic user journeys.
- Automated business workflows using custom scripts and API integrations, reducing manual effort by approximately 70%.
- Integrated API-driven systems to improve operational efficiency and real-time data synchronization across platforms.
- Contributed to performance optimization and production-stability initiatives, minimizing downtime and regressions.

Frontend Web Developer — Semtitans Digital Private Limited

November 2021 – October 2024 | Navi Mumbai, India

- Developed 50+ Shopify and WordPress websites for D2C and e-commerce brands, from architecture through launch.
- Built custom Shopify Plus themes, landing pages, and conversion-focused storefronts that improved on-site conversion rates.
- Improved Core Web Vitals, page speed, and SEO performance across multiple client projects.
- Integrated third-party APIs, payment gateways, and marketing/automation tools into production storefronts.
- Led frontend development initiatives and established reusable component architecture, improving delivery speed across the team.

WordPress Developer — Biogetica

January 2020 – October 2021 | Mumbai, India

- Built and maintained frontend interfaces for content-driven and e-commerce websites.
- Improved UI performance, responsiveness, and accessibility across key customer-facing pages.
- Resolved UI and integration issues with minimal downtime, supporting continuous site reliability.

SELECTED PROJECTS

ECOM — Enterprise Multi-Tenant Commerce Platform

- Architected a multi-tenant, AI-powered commerce platform (Next.js 14 + .NET 8) covering B2C, B2B, marketplace, vendor, and wholesaler operations, with a documented cost analysis showing \$6,000+/year in eliminated SaaS licensing versus Shopify/Magento equivalents.
- Designed a dual-backend architecture (Next.js API routes for customer-facing flows, .NET 8/EF Core for enterprise reporting) and a defense-in-depth security model (Supabase RLS across 20 tables, rate limiting, audit logging).
- Built dual AI copilots (customer shopping assistant, admin BI copilot) using the Vercel AI SDK and OpenRouter, with tool-calling against live product/order data and multi-model provider switching.
- Defined a phased roadmap (marketplace, B2B, multi-tenancy, AI expansion) to evolve the platform from single-tenant MVP to SaaS-ready product.

PolyMind — Multi-Provider Agentic AI Assistant

- Built a multi-provider agentic AI assistant using FastAPI, LangGraph, and ChromaDB, supporting interchangeable LLM providers (OpenAI, Gemini, Claude).
- Implemented RAG pipelines for context-aware responses and deployed the system on Railway for production access.

SreeMarket — Multi-Vendor E-Commerce Marketplace

- Built a full-stack multi-vendor marketplace (Java/Spring Boot, MySQL, React/Vite, Next.js) spanning customer, vendor, wholesaler, and admin experiences, plus companion React Native mobile apps.
- Shipped an AI-powered customer support chatbot ("WooAI") with session management and policy-based routing.
- Debugged and resolved a critical KYC/payment data integrity issue in the vendor onboarding pipeline, improving onboarding reliability.

NexusKit — MCP Server Monorepo

- Built a production-grade Model Context Protocol (MCP) server monorepo using Bun and TypeScript.
- Conducted a full production readiness review covering code quality, structure, and deployment considerations.

Nexus Agent / Orbit-CLI — AI Coding Assistant CLI

- Led architectural analysis and designed a fresh-start build plan for an AI coding assistant CLI using Bun, TypeScript, Hono, Drizzle ORM, Better Auth, and the Vercel AI SDK.

Confucius Code Agent — Open-Source Multi-Model CLI

- Built an open-source, multi-model CLI coding agent supporting multiple LLM providers for developer workflows.

NexaStore & shopIN — AI/E-Commerce Web Applications

- NexaStore: Built a futuristic AI-powered e-commerce React application with modern UI/UX patterns.
- shopIN: Built a comprehensive, mobile-first Indian e-commerce React application combining Flipkart, Amazon, and Blinkit UX conventions.

EDUCATION

Bachelor of Computer Applications (BCA), Computer Science — Bharati Vidyapeeth, Mumbai (2017 – 2021)

CERTIFICATIONS

- Generative AI Mastermind — Outskill
- Building AI Agents and Agentic Workflows Specialization
- Google Project Management Certificate
- Shopify Theme Development: Online Store 2.0 + Tailwind CSS
- Simplified Magento 2
- IBM, JPMorgan Chase, and Deloitte Job Simulations — Forage
